## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 2-4 are allowed. The prior art does not teach a synchronous induction machine with a permanent magnet, squirrel-cage rotor wherein, inter alia, the magnetomotive force generated by one pole of the rotor is a value equal to or less than 10% of a peak value in a predetermined range at a non-continuous portion of a waveform of the magnetomotive force near an electrical angle of 0 or 180 degrees, and the magnetomotive forces generated by the rotor in a range of electrical angle other than the predetermined range equal to or less than 10% of the peak value are distributed in a sine wave shape (claim 3) or a step-like, chevron-shape having two or more steps (claim 4). In particular, Zolliker, Naito, and GB '941, alone or in combination, do not teach a sine- or stepped-chevron-magnetomotive-force distribution shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
